Burlingame, CA 94010

#### PROFILE

Entrepreneurial-minded Technology, Database Management Strategist, & Front-end Developer with consistent success in supporting, growing and improving the profitability, performance and value of companies. Serves as a planner and workflow specialist at identifying and capturing business opportunities within the technical support environment for diverse industries. Recognized as an organizational driver who applies forward-thinking problem identification, research, analysis, and resolution to define requirements and deliver rapid prototyping, implementation, and testing. Seeking a BI Developer position within a progressive and dynamic organization, allowing for utilization of current qualifications and growth of new capabilities.

- ❖ Serves as an intuitive thinker with a strong understanding of the right metrics and roadmaps for the complex Tech industry.
- ❖ Evaluates marketplace data, assesses current conditions of technical planning and guides implementation of resources, defining short- and long-term growth targets.
- ❖ Resolves complex problems while maintaining focus on achieving the right end results through formulation and implementation of advanced technology and business solutions to meet a diversity of business needs.
- ❖ Collaborates with multi-functional teams to develop business cases and matrices, and define new services, products and business and strategy initiatives.
- ❖ Capability to manage and execute all phases of the data warehouse project life cycle, including scoping study, requirements gathering, architecting, design and development, implementation, quality assurance, and application support for end-to-end IT solution offerings.
